

OSCC REVIEW - DATA EXTRACTION	
Reviewer	
Date	
Notes:	
1. IDENTIFICATION	
RefID	
Authors	
Title	
2. ELIGIBILITY	
Is the study eligible for inclusion?	
Reason for exclusion	
3. SETTING, DEMOGRAPHICS, AND PARTICIPANTS	
Location of study (city, district, state, country)	
Name of OSCC	
Responsible agency (NGO-based, governmental- based, combined)	
Setting location (acute care hospital, emergency setting, general practice clinic, community)	
Language	
Participant characteristics (victims/survivors of intimate partner violence, sexual violence, child abuse, etc).	
# of participants (total; specify how many per FGD/how many interviewed)	
Participant sex	
Participant age	
Perspective (user, provider, programme manager, policy maker, multiple)	
4. INTERVENTIONS	
Medical services provided? (yes/no); Describe details: who provided care (doctors, nurses, etc), location of clinical services (on site or referral), services provided (general services, forensic exam and specimen collection, HIV and STI screening and prophylaxis, emergency contraception, etc.)	
Psychosocial support provided? (yes/no); Describe (emergency and/or long-term support/counselling, availability of specialized psychiatric services)	

Legal support? (yes/no); Describe (on or off site, description of legal and advocacy services available)	
Police and reporting assistance services?	
Social worker? (yes/no); Describe (on or off site, services provided)	
Shelter? (yes/no); Describe:	
Other? (yes/no); Describe:	
5. STUDY DESIGN & DATA COLLECTION	
Aims or objectives	
Study design (randomized, cluster, cross-over)	
Study duration	
How was the sample formed? Recruitment strategy?	
Concerns about bias (indicate if own concerns or author's concerns)	
How many sites included in the study?	
What data collection method was used? (i.e.: focus group, in-depth interview, survey)	
Description of data collection	
Impression of methodologic limitations (minor, moderate, significant)	
6. ETHICS	
How were ethical issues addressed?	
7. DATA ANALYSIS	
What data analysis method was used (i.e.: grounded theory, thematic analysis, description of quantitative analysis)	

If there is no quantitative component, skip to section 9.		
9. QUANTITATIVE DATA EXTRACTION (note: the quantitative studies have a broad range on outcomes collected/report unsure of how to extract)		
Data source		If other or multiple - specify source
Comments on study design		
1-Describe in words the first OSCC outcome measure		
1-What outcome measurement is used (i.e.: percentage, prevalence, OR)		
1-Describe # of cases, denominator, percentages and any other relevant outcome measures IN DETAIL		
2-Describe in words the second OSCC outcome measure		
2-What outcome measurement is used (i.e.: percentage, prevalence, OR)		
2-Describe # of cases, denominator, percentages and any other relevant outcome measures IN DETAIL		
3-Describe in words the third OSCC outcome measure		
3-What outcome measurement is used (i.e.: percentage, prevalence, OR)		
3-Describe # of cases, denominator, percentages and any other relevant outcome measures IN DETAIL		
4-Describe in words the fourth OSCC outcome measure		
4-What outcome measurement is used (i.e.: percentage, prevalence, OR)		
4-Describe # of cases, denominator, percentages and any other relevant outcome measures IN DETAIL		
5-Describe in words the fifth OSCC outcome measure		
5-What outcome measurement is used (i.e.: percentage, prevalence, OR)		

5-Describe # of cases, denominator, percentages and any other relevant outcome measures IN DETAIL	
10. CONCLUSIONS	
What are the author's main conclusions?	
11. COMMENTS	
Reviewer comments
