Cost effectiveness threshold in China Questionnaire

Willingness to Pay

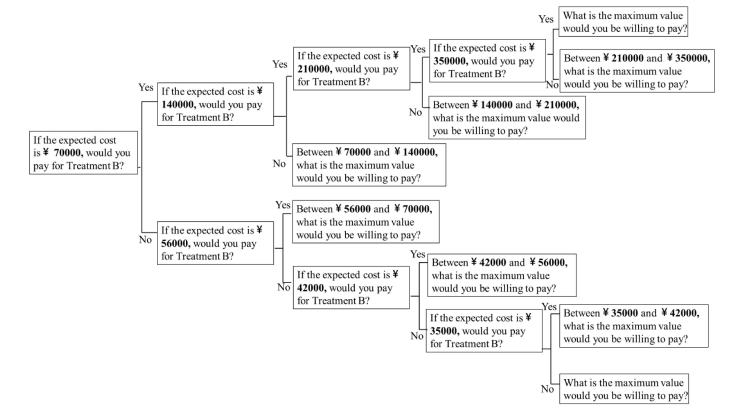

Scenario A

Imagine that you have a common non-communicable chronic disease. Now, please assume that Treatment A is able to extend your life by one full year. You will be completely healthy in this extended year without any pains. However, the Treatment A is not covered by your public health insurance scheme and you do not have any private health insurance to pay for this treatment. **All** expenses will be covered out-of-pocket.

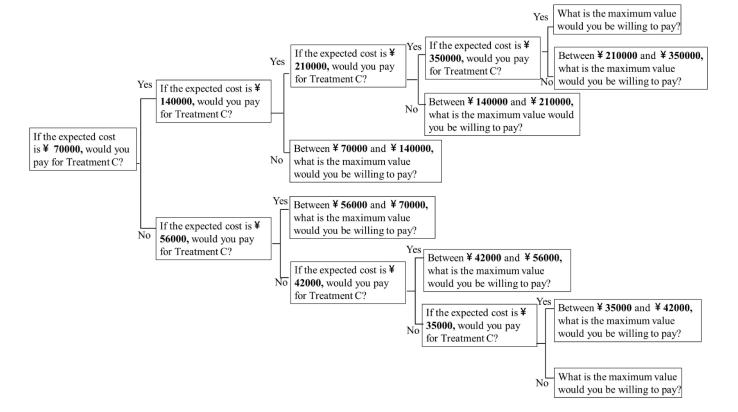

Scenario B

Imagine that you have a rare disease that immediately threatens your life. Now, please assume that Treatment B is able to extend your life by one full year. You will be completely healthy in this extended year without any pains. However, the Treatment B is not covered by your public health insurance scheme and you do not have any private health insurance to pay for this treatment. **All** expenses will be covered out-of-pocket.

Scenario C

Imagine that you have a serious fatal disease that immediately threatens your life. Now, please assume that Treatment C is able to extend your life by one full year. You will be completely healthy in this extended year without any pains. However, the Treatment C is not covered by your public health insurance scheme and you do not have any private health insurance to pay for this treatment. **All** expenses will be covered out-of-pocket.
